Managing hypertension with renal impairment – a multidisciplinary challenge

Satellite Symposium, The BRS/RA Conference Glasgow 2008

In association with the Scottish Renal Association

Tuesday 13 May 2008

Chair: Dr Donal O'Donoghue, Consultant Renal Physician, Salford Royal Hospitals Foundation Trust, National Clinical Director for Kidney Care

- **Why are we not achieving blood pressure targets in renally impaired patients?**
- **What options do clinicians have beyond triple therapy?**
- **What does the latest study evidence tell us?**

In spite of increasingly aggressive management of hypertension, almost 5 million treated hypertensive patients still fail to reach target. Hypertension is virtually ubiquitous in patients with renal impairment, and this co-morbidity presents a particularly complex multidisciplinary challenge. Are these patients being optimally managed? What does today's armamentarium offer in terms of new opportunities? And where does the latest evidence lead us?

This unique, interactive satellite symposium will address these questions by exploring the underlying mechanisms involved in renal disease, reviewing its impact on cardiovascular disease, and discussing best-practice management protocols.

To maximise delegate interaction, keypad technology will be used throughout the symposium.

Managing hypertension with renal impairment – a multidisciplinary challenge

Programme

3.00pm **CKD: the challenge in perspective**

Epidemiology of CKD and current understanding of the importance of proteinuria

The tubular toxicity of proteinuria

Dr Donal O'Donoghue

Consultant Renal Physician,
Salford Royal Hospitals Foundation Trust,
National Clinical Director for Kidney Care

Professor Nigel Brunskill

Professor and Chief Physician,
Consultant Nephrologist,
Leicester General Hospital, Leicester

3.30pm **Managing renal disease, cardiovascular disease and diabetes: a review of the evidence**

Professor Hans-Henrik Parving

Professor and Chief Physician,
Department of Medical Endocrinology,
University Hospital of Copenhagen

4.00pm **CKD and hypertension in the real world: Interactive quiz / case discussions**

Facilitator: Dr David Wheeler

Reader in Nephrology, Royal Free and
University College Medical School,
University College London

Panellist: Ms Nicola Thomas

Renal Specialist Nurse and Senior Lecturer,
City Community and Health Sciences,
City University, London

Panellist: Dr Ian Wilkinson

GP, Oldham

4.30pm **General interactive discussion and summary**

5.00pm **Meeting close** (buffet refreshments will be served)

If you would like to attend this meeting, please click on the email link: BRS@pivhealth.com to register your interest, and include in your email the following details (**NB.** To attend this satellite symposium you **MUST** be registered for the BRS/RA Conference):
